1. **Place the 3” Support upright on the ground. With flat side of the Bench/Bar Leg facing downward, (starting at one end) push the slot in the center of the Leg into the slot on the Support (Figure 1). Repeat this process with the remaining Legs, spacing them evenly (depending on the number of Legs and the application). See Figure 2.**

Note: There will be unused slots in the Support.

- 2. Line up slots in the second 3" Support with the slots in the top of the Legs, and, working from one end, tap the Support into place with a rubber mallet. (Figures 3 and 4)**

Figure 3

Figure 4

- 3. Turn the leg and support assembly upside down and position the snap lugs into the corresponding holes in the bottom of the Plank (Figure 5). Strike each leg with a rubber mallet on both sides as indicated in Figure 6 until all legs are locked into position.**
